CONFERENCE GOAL

IIW YPIC aims at gathering worldwide students and young professionals who are specializing in welding and related technologies. The main goal is to raise awareness of industrial issues by providing a forum for networking, for sharing and harmonizing ideas.

This event aims to integrate and mediate professional knowledge in the fields of welding and related technologies and non-destructive testing. It is an opportunity for young researchers and professionals to share and exchange results.

Event's highlights:

- Speed dating ice breaking
- Conference with oral presentations
- Team Building
- Networking events

CONFERENCE TOPICS:

- Welding technology and related technologies
- Non-destructive testing
- 3D Printing and additive manufacturing
- Industrial unmanned aerial vehicle and objects connected

There is no restriction in categories and ages of participants. Professors and industrial representatives are welcome as well.

The conference includes an exhibition designed as a platform to facilitate contact between young professionals and companies.

CALL FOR PAPERS

Authors wishing to present a contribution are kindly requested to submit an abstract in English (500 words max.) including title, author names, affiliation, and complete correspondence information of the lead author.

Word templates are available on the website of the conference. All submissions must be made online.

Please submit your paper by 30 April 2018 to ypic2018@isgroupe.com. Authors will be notified of acceptance of their paper in May 2018.

The presentation delivered in English must be no longer than 15 minutes. After presentation discussion will be open for about 5 minutes.
